🎓 EDUCATION

Bachelor of Arts, English - University of California, Berkeley
August 2012 - May 2015
GPA: 3.4

Full-Stack Javascript Boot Camp - Coding House
April 2016 - July 2016

📕 PROJECTS

Drink, Drank, Drunk

Summary:
Motivated by my own self-interest to learn about beer, I have built a MEAN stack web application that harvests data from the Brewery DB

database.

Role:
This is a personal project, so I am responsible for the entire stack.

Technology Used:

- Node.js
- Express.js
- Angular.js
- MongoDB
- AWS S3
- BreweryDB

JSM

Summary:
JSM is a web application that helps a user manage the job search process by keeping dates, events, and information organized and calendared.

Role:
I was responsible for both front-end and back-end API work, as well as the user authentication system.

Technology Used:

- Node.js
- Express.js
- Angular.js
- MongoDB
- Google Calendar API
- Google Mail API
- SendGrid API
